

Critical Raw Materials

CRMs are materials of high economic importance with a high risk of supply for Europe, since they are mostly sourced outside the EU

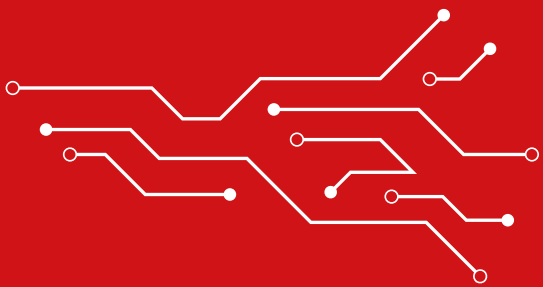

**Why are they so
important?**

The demand for CRMs is expected to increase exponentially in the next years, as they are essential in industries which play a strategic role in the green transition, like:

renewables

ICT

e-mobility

PERMANET

Join us to explore how
PERMANET is driving the
circularity of **Rare Earths**
in Europe!
